FYP

FYP supervisors and co-supervisors

- Chris Exton
- Mark Burkley
- Roisin Lyons
- James Patten
- Colin Venters
- Stephen Kinsella
- Birgit Penzenstadler
- Rob Bordianu
- Eoin O’Brien
- Marie Travers

Potential projects

Human-Computer Interaction and AI: Challenges and opportunities	Marie Travers
GitHub code checkin monitoring	Chris Exton
Commuter Related Projects	Roisin Lyons
Use of chatbots or VR for education	Roisin Lyons
Ethical reflection or decision-making for technical founders	Roisin Lyons
AI in health: challenges, and future directions	Marie Travers

Update to submission dates

FYP Proposal Form	**08/10/2026**
FYP Interim Report	**06/11/2026**

AI enabled features to aid research

- Last week we discussed AI use in research such as prompts and reviewing outputs.

- Reference management software such as EndNote and Mendeley also have included AI enabled features to aid research.

Is the use of AI permitted for all FYPs?

- Refer to the FYP specification for information regarding permitted AI use and how to declare AI use.
    - Discuss with your supervisor.
    - If AI use is permitted it must be declared.

Is the use of AI permitted for all FYPs?

Excerpt from FYP specification:

The use of generative AI for any part of the project, at any stage of the process is not permitted, apart from the following scenarios:

- The express, written, permission of the supervisor is obtained by email and a copy of the email exchange detailing the student's request and the supervisor’s response is included in the report (interim and/or final). Further, the report must then include a declaration that describes in detail which AI was used, how and for which purpose.
- The use of generative AI is an integral part of the project, and is as such discussed, in full, in the report.

Types of Research

- Primary – original data for subsequent analysis. For example, conducting experiments, or designing and carrying out interviews.
- Secondary – researching ideas and contributions of others, for example, books, journals.
- Quantitative – numerical data.
- Qualitative– word based subjective data.

Research Methods

- How we collect, analyse and interpret data
  - Qualitative
    - Experiences, words, meanings
  - Quantitative
    - Numerical
  - Mixed
    - Qualitative & Quantitative

Which research method to use?

- Depends on your research question

Useful textbooks

- How to Research by Blaxter, L. et al. (2001) Open University Press
- Qualitative Data Analysis: A Methods Sourcebook by Matthew B. Miles, A. Michael Huberman & Johnny Saldana (2018), Fourth Edition, Sage Publications, Inc
- Research Design: Qualitative and Quantitative Approaches by J. W. Cresswell (1994) Sage
- Research Design: Qualitative, Quantitative, and Mixed Methods Approaches By John W. Creswell, J. David Creswell SAGE Publications 2022
- Design Research: Methods and Perspectives by Laurel Brenda (editor) (2003), MIT Press

Group activity

- Topics
  - Quantitative Research
    - Bias, Representativeness, Variability, Sampling, Randomisation etc.
  - Qualitative Research
  - Mixed Research Methods
  - Statistical analysis methods, including statistics
